

Delia Board of Trade

The annual general meeting of the Delia and Community Board of Trade was called to order by the president, J. B. McCully, at 8:45 p.m. on Tuesday, February 7th, 1950.

The minutes of the previous meeting were read by the secretary and adopted as read on motion of S. H. Martin, seconded by E. L. Lander.

The president commented at some length on the efforts made to ensure skating rink facilities, and pointed out that the Board is responsible for the caretaker's wages from January 15th to the end of the season.

Moved by L. E. Lander and seconded by Mrs. V. Barsa, that \$5.00 be donated to the Junior Grain Club, and earmarked for the purpose of paying for the rent of the hall for the day of the Grain Club fair. Carried.

Moved by S. H. Martin and seconded by L. E. Lander, that arrangements be made to rent the hall for a short course to be sponsored by the Department of Agriculture, for a date to be decided in the week of February 27th to March 3rd. A lady speaker to cover subjects interesting should be requested. The motion carried.

Correspondence from the Hanna Board of Trade and Dominion officials was read, and a financial statement given by the secretary.

Due to a small attendance, an election of officers for 1950 was not possible, and the incumbent president and secretary will continue to act provisionally for a period of six months.

Motion of Mrs. Barsa, seconded by B. Schoeppe, Mr. L. E. Lander was returned as vice president, and the 1950 executive comprised the following: W. A. D. H. Campbell, Mrs. Lowe, Mrs. Mason, and Mrs. Barsa. Carried.

The secretary was instructed to write Mrs. Lowe and Mrs. Thompson letters of thanks for their efforts on behalf of the skating rink.

The meeting adjourned, and lunch was served by the lady members.

Wedding Bells

Patrick—McLaren

Heather Clinton, tied with tartan ribbons, marked the guest pews in Knox United Church at the double ring candlelight wedding of Melvin James McLaren and Emma Jack Patrick, which took place in Vancouver, B.C.

The ceremony, solemnized by Rev. S. G. Woolfrey, was followed by a reception at "The Hollies," where the groom's uncle, Mr. F. N. Robertson, proposed the bride's hand.

The bride, daughter of Mr. Hugh Strang McLaren, of Delia, Alta., and the late Mrs. McLaren, has made her home while in Vancouver with her grandmother, Mrs. Magdalene McDonald.

Mr. and Mrs. E. J. Patrick, of Vancouver, are the groom's parents.

Given in marriage by her father, the bride was attended by her sister, Mrs. C. A. Kennedy, of Calgary, as matron of honor, and by the groom's sister, Miss Laurette Patrick, and Miss Jean Matthews.

Mr. Gray H. Rix, of Victoria, was best man, and Mr. Russell Johnson, of Calgary, and Mr. Robert Bradshaw, of Delia, were bridesmaids. One of the bride's fellow choir members, Mrs. Clarke, was soloist. Amongst the guests was another sister from Calgary, Miss Phyllis McLaren.

The wax was in the bodice to form a yoke for the long chiffon velvet bride gown. White gloves were pointed and the full skirt was in train. A coronet of pearls held the tulle illusion chapel veil, and in the bride's bouquet were orchids and orange blossoms.

A net-yoked gown of gold lace, with long matching gloves, was worn by Mrs. Kennedy. The full skirted frock was styled with fitted bodice that outlined its neckline with upstanding double folds. She wore an orchid pinned head-dress and her orchid centred bouquet was encircled by a net veil.

The bridesmaids wore identical tulle frocks, with ties in pinks of green and orchid, and long tulle gloves. Off-shoot necklaces capped the arms, and below elbow length gloves were gold encircled mesh. Orchids centred the mixed flower bouquets.

Sunbeam News

Mr. and Mrs. A. Dick, daughter Carol, and Wilbert Tulley, daughter Victoria to Hanna Saturday last.

Mr. and Mrs. Allan Hodge, of Onda, motored down and spent the week end at the Hodge and Nelson homes.

Mr. and Mrs. Orville Taber, Mr. and Mrs. Russell Fraser, Mr. and Mrs. Harold Nelson, and Mr. and Mrs. George Carter, were dinner guests at the home of Mr. and Mrs. Howard Stevenson last Monday evening.

Miss Vera Ballan, from Kitchener, Ontario, spent last week end with her sister Nancy, who is staying at the Despreux home.

Mr. A. C. Nelson, from Calgary, is a business visitor in this district last Tuesday.

Mr. and Mrs. W. J. Nelson were guests at the Miles home, in the Enterprise district, last Sunday.

Mr. and Mrs. Walter Shumaker, from Rowley, were visitors at the home of Mr. and Mrs. Clifton Chambers on Sunday.

Willis and Ray Nelson made a couple of business trips to Calgary during the past week.

Mr. and Mrs. Harry Morrison, and Mr. and Mrs. George Humphries from Delia, were visitors at the home of Mr. and Mrs. Harold Nelson on Wednesday evening.

Mrs. Charlie Chambers returned from the Drumheller hospital on Wednesday last, and is now convalescing at home.

Mrs. Fult Johnson, Mrs. Alex Dick, and J. Carol, and Jim Johnson, were Hanna visitors last Thursday.

Adele Scogland, little daughter of Mr. and Mrs. Andy Scogland, was rushed to the hospital on Wednesday afternoon for an emergency operation for appendicitis.

Mr. Arthur Pontifex spent last week in Calgary.

Mr. and Mrs. Harold Nelson were visitors at the home of Mr. Frank Dodd, in the Rowley district, on Thursday.

Rev. Stanley Hunt and Mrs. Hunt, from Hinton, were visitors at the home of Mr. and Mrs. Ed. Despreux last Sunday.

THE WORLD OF WHEAT

Marketing Canada's Products

The marketing of Canada's agricultural products has been made difficult in the past. Almost overnight, important markets have drifted away and expectations of a long period of price security and of assured markets have been frustrated.

Yet the F.A.O. still take that nothing like enough food is being produced to satisfy the needs of the hungry people of the world. But in Canada and some other countries, the spectre of unusual surpluses is beginning to frighten us, and this in spite of the International Wheat and Cereals Conference.

The sensible person will wish to consider the situation dispassionately and quietly, setting aside mere emotion. What can we do? One thing seems to be obvious. Now that Britain is determined to buy elsewhere than in Canada, our only hope must be to win back the markets that we once enjoyed in a hundred different countries in the world. The time has come by when we could talk back and merely wait for orders from these foreign people. Our agricultural products now have to be sold by aggressive, experienced and well-trained salesman. These men exist by the hundreds in the grain and livestock trades. Nonetheless, there must be made, it would seem, to encourage these men to go energetically to work.

Correspondence

To the Editor of "The Delia Times":
Let us ponder a few moments on the subject—the Board of Trade—let us think of what it stands for, its functions and its accomplishments.

Firstly, a Board of Trade is made up of community individuals interested in the material betterment of the conditions under which we live in our own district. The members are you and I, our friends and relations. It is a non-partisan group, non-political and without religious or fraternal commitments of any nature. It is truly an organization of representatives whose aim is to be the desires of its assemblies at large, and whose purposes will be achieved in measures equal only to the effort and discernment of its members.

Naturally, no subject is so inconsequential for the election of a Board of Trade, but in the main its objective falls into the category of social improvements, better and increased utilities and the utilization of all ever-expanding thoughtfulness for our needs and the betterment of the society of man.

It is not primarily an organ of the commercial business men, or the agriculturist, or the industrialist, but it is the key to their interdependence.

Our own Delia and Community Board of Trade, while little in numbers over the past few years, has been quite active. Two years ago, when the highway was so badly damaged by snow and no apparent effort was made to clear it, our committee dispatched a telegram to the Department of Public Works requesting that immediate action be taken in order that residents might have access to doctor and hospital if necessary. A telegram was received from the Department the next day to the effect that a plow was being sent from the Calgary division, and work began the following day to open the road between Hanna and Drumheller.

About the same time as above, when the weather was so bad, we were in the water area. The Board requested the local authorities to have men in turn ordered on a regular basis. On numerous other occasions the weight of our committee has been in aid of improved municipal roads as well. The new road through the Agricultural grounds was the outcome of one of these representations.

At one time, the local depot platform was so short, that heading a passenger train in inclement weather was a hazardous affair. The facilities of the Delia Board of Trade, in conjunction with the A.M.A., has seen the establishment of such needed road markers. The facilities of a skating rink for the children this year was made possible by the Board paying a portion of the caretaker's wage, and over the years the Rest Room group have bettered their service through the financial support of the Board.

During the past, many agricultural field days and forums have been sponsored by the Board, and have been donated for junior club work, and close contact and support given the District Agricultural in the furtherance of his work among the farmers.

It was delegation from the Board that aided in selecting a Physical Culture Institute, and is still aiding financially in the establishment of a centre. The question of doctor and hospital facilities was given public hearing by this organization, and a great deal of investigation done on behalf of a proposed community hall.

It can readily be seen that the aspirations of such a body are of limitation.

You share in the achievements of this group whether you are a member or not; so when you are next asked to join, when you say "I will," and more willingly attend meetings when notices are posted?

LESTER W. BATTLE,
Secretary-Treasurer,
Delia and Community Board of Trade.

Mrs. Violet Barnes has been appointed collector in Delia for the Canadian March of Dimes Fund, to combat poliomyelitis.

Spring Plough

Lethbridge Experimental Station
Weekly Letter

A proper one of baby chicks to the step in raising chickens that is profitable as layers or as meat birds. There are several steps that should be followed, in order to give chicks the proper care.

First, it is essential to know where the chicks come from, that is, make sure they are from flocks free from disease, venereal, high production, and economical gain.

Second, provide a clean warm shelter for the chicks. Clean and protect the house and equipment thoroughly at least two weeks before the chicks arrive. Scrub the floors and equipment with hot water and lye, and whitewash when the house is dry.

The next step is to be certain the brooders are in good running order, and to assure this, have them in working order a few days before the chicks arrive. This will allow time to adjust the temperature and make any necessary repairs. For the first week, the temperature should be around 95 degrees two inches from the floor at the edge of the brooder.

The thermometer is only a guide to the right temperature. Scrub the floor at the edge of the brooder where the temperature is higher. As the chicks grow older, lower the temperature so they will stay on the floor at night. Allow enough room under the brooder, around 250 chicks in a 10x12 foot room, would reduce the possibility of overcrowding.

It is possible, keep all young stock away from adult birds, and away from pens and yards that have been used by adult birds during the previous year. Always bring new birds to the farm as day old chicks, to prevent introduction of disease or adult chicks.

Get the birds out of doors whenever the weather permits and provide a clean yard or paddock. Chicks raised in confinement can be given extra food space through the introduction of sunbaths until they are ten weeks of age, when they are ready for range.

Get the birds out of doors whenever the weather permits and provide a clean yard or paddock. Chicks raised in confinement can be given extra food space through the introduction of sunbaths until they are ten weeks of age, when they are ready for range.

"MRS. SMITH SAYS
OIL HEATING IS THE
REASON THEIR HOUSE IS
SO CLEAN AND
COMFORTABLE"

Have a cleaner, more comfortable home. And have time to spare for the nice things you want to do. Heat and cook with oil and harness time-wasting demand, and extra cleaning caused by ashes and dirt. Use Esso Domestic Heating Oil in space heaters, hot water heaters, stoves, stock trough heaters and chicken brooders. See your oil burner equipment dealer for installation and service. Contact your nearest Imperial Oil Office or Agent for your supply of Esso Domestic Heating Oil.

COMMUNITY CO-OPERATION

I can take the wrinkles
out of your shirt,
whether you use an
ironer or an automa-
tic iron.

But I don't just get the "kinks" out of your clothes. I co-operate by "giving," not just "taking" from the farmer and pioneer of our towns.

A community can get "growing pains" as its population increases, for the problems become greater in number and size. But if we pull together, steadily like the cren of pioneer days, we will solve these problems by changing the gears, instead of stripping them.

I get things done. I am not critical, and I am progressive. I supply the power to help build the power equipment as well as the light to see the game, whether the project is a hockey arena or a curling rink.

And once on the scene... I remain.

Your co-operative,
REDDY KILOWATT.

Agricultural Scientists Trying To Produce "Hot Weather" Cow

WASHINGTON.—United States agricultural scientists are trying to breed a "hot weather" cow. If successful, they say, the experiment may change the dairying picture of the southern United States. The cow is the first two-way cross in a breeding program to develop a dairy-cattle strain which will be resistant to the hot weather of the southern states and still produce milk in amounts comparable to northern cattle.

The experiment entered its fourth year in 1934, when a cross between a Jersey breed and a red and white cow was made. The red and white cow was a member of the American Red breed, which is a government experimental station in Maryland. The red strain is the dairy strain of the Brahman cattle of India. The red strain is the dairy strain of the Brahman cattle of India. The red strain is the dairy strain of the Brahman cattle of India.

The average milk production in farms of about 80 pounds annually is being bred in the breeding experiment cases averaged above 4,000 pounds annually. It is being bred to the United States.

In addition to the tests in Maryland, dairy farms are under way at three Louisiana experiment stations.—at Baton Rouge, where the animals are being crossed with the Jersey breed, at Thibodaux, where they are being crossed with the Jersey breed, and at Lake Charles, where they are being crossed with the Jersey breed.

For example, the average milk production by cows in the United States has increased only from 4,200 pounds in 1925 to about 5,000 pounds now. In the same period, cow yields have risen from 60 pounds in 1925 to nearly 100 per cent, and eggs 35 per cent.

And, these sources add, the American public could use 35 per cent more dairy products, if the price is right.

VICTIMS OF FIRE—Mrs. Mabel Margaret, 26, of Denville, Ont., who was killed in a fire at her home, is shown in a photograph with her daughter, Margaret, who was also killed in the fire.

Do You Like Fried Eggs?

CHICAGO.—Like fried eggs? Watch out. Any man who does may be a nervous or ill man.

Says he you have thought your tastes in food come to a happy ending for a psychiatrist. Yet, after some study, it may be a clue.

For example, tests have shown that while practically every normal man likes fried eggs, the neurotic man does not like his eggs fried. And among illiterates, only 20 per cent do.

And take the humble cabbage. Owing to its use in the United States, it has been called the "cabbage of the north." It is the cabbage of the north.

Prof. Paul R. Wallen, Western Reserve University, ran the food tests on 100 men. He found that 62 per cent of the neurotic men liked fried eggs. Among the normal, only 11 per cent.

Wallen decided that the dislikes begin in early life as the result of "emotional experiences at meals, family and capricious training habits and fear of the new and strange."

With Wallen's data as a starting point, Prof. William D. Allen, Santa Barbara College, tried somewhat similar tests on Army illiterates. Results of these tests were made public in the December issue of the *Journal of Consulting Psychology*.

Allen says he had in mind 12 of the 20 food Wallen used in his tests. For instance, he figured that any one who couldn't read wouldn't be likely to know much about mushrooms or olive oil.

But even when substituted plain food foods, for example, like lettuce, after pretty choice. Although any man who has watched soldiers on battle lines might not want to give 17 per cent of the Army illiterates fried eggs like him. Also, 20 per cent didn't like butter and 20 per cent didn't like milk.

Wrestler Challenges Anyone To Beat Egg-Eating Record

VANCOUVER.—John Whelan, a 25-year-old city clerk, has challenged anyone to beat his record of eating 100 eggs in 10 minutes. He has eaten 100 eggs in 10 minutes.

Leading a band to the British Columbia "Poultry Industries Association's" Egg-Eating Contest, Whelan said: "I want to see if anyone can beat my record. I want to see if anyone can beat my record."

Whelan said he had been "broken" by his mother and died his hair at the car's hair.

Driving Car For Year Without Any Gasoline

LONDON.—Frank Alfred Cowley, 28-year-old London-born engineer, says Britain's gas rationing doesn't bother him. He is driving his car for a year without a drop of gasoline. He claims to have perfected a new "solid fuel" and an adaptor to use it in his car.

After warming up the engine on a liquid fuel such as paraffin, he inserts a tube of granular substance into the fuel tank and the car starts and drives off.

He says he goes 50 miles to the pound of fuel.

"My car is normal in every way except that it fits my own carburetor and a bigger battery."

He says he has a gasoline cylinder for the solid fuel and an expansion tank on the market which is a pump from the pump, gas from the exhaust to the fuel tank and the vapor from the pump from the water in the tank.

"These are passed through 10 jets in my special carburetor."

He says that if the gas is too "solid" or "hard" or "stale," it can be made, including by-product of the gas, and even a candle. The best would be carbon, except from the pressure of a car when it is de-carbonized.

Cowley keeps on a petition to the gas rationing board. The cost of converting an ordinary motor to the Cowley motor?

"About £50 (£100) and cost of the solid fuel will be about half that of ordinary gasoline."

C.E.F. Originate New Raspberries

Seven promising raspberry varieties, Oregon, Adams, Trent and Nevada, have been developed by the U.S. Department of Agriculture, suggests to home-growers who are reaping or making over leather articles as sports jackets, handbags, hats, straps and shoes. The new varieties are being tested in the U.S. Department of Agriculture, suggests to home-growers who are reaping or making over leather articles as sports jackets, handbags, hats, straps and shoes.

CONTRIBUTORY SOCIAL SECURITY

Canada's Minister of Health, the Hon. Paul Martin, forwarded Stanley Knowles (C.C.F. Winnipeg North Centre), as well as many other people, when he announced in parliament last week the intention of the government to set up a commission to study various aspects of social security measures, as carried on in other countries.

The Liberal administration has arrived at a period when it has become necessary to institute some measure in order to retain the confidence of the

electorate. Stripped to essentials, what is demanded with growing urgency in many quarters, is abolition of the means test for old age pensions. A move that would not be warranted without the inauguration of a compulsory contributory scheme. No other course would feel the country is with a bill close to 300 million dollars annually for Family Allowances.

There are other considerations. Canadian Labor unions are comparing conditions here with those across the border. It is far ahead, and entrenched privileges will be demanding and receiving a monthly pension of \$100 at the age of 60 at the expense of their unorganized fellow workers.

This contributory social security is overdue in Canada. It is fairer, because it can be made applicable to all. No doubt there are difficulties to overcome, but they are not insurmountable, as has been found both in Sweden and Great Britain.

TASK OF THE PRESS

Today, a distrustful world is looking for an answer, both to war and for the building up of a better social order. The newspaper, which goes into nearly every home in most countries, has power to change the tide of thinking in its community. This makes the task of the Press pre-eminent.

Journalists have been described as possible "friends of a new world order," because they can make so great and positive a contribution to the liberation of the world from darkness.

There is one kind of writing behind which you sense a good brain. There is another kind of writing behind which you feel the beating heart. Through the power of this latter creative writing, the Press will lead regeneration. To do this, it is necessary to stop thinking only in terms of the written word, but also in terms of real living experience. From the heart of man will come a new beginning of history or its end. Man himself is the cause of war or the basis of peace, and the journalist can only propagate this idea if he starts with himself. Living is more important than talking and living is even more important than writing.

Our times demand the application to all our lives of a vital Christian ideology—people who live their faith according to the moral laws. Programs of religion are important but not the end. To play its part in the regeneration of our own and other countries, is the greatest task the Press can undertake.

Mr. and Mrs. E. Hall and family were week end visitors to Calgary.

Alex. Aitken and V. Kidston journeyed to Edmonton by bus on Tuesday morning.

Donald Herwig was a visitor by bus to Calgary on Sunday evening of last week.

Miss Valerie Larder, of Calgary, spent the week end with her parents recently.

Mrs. M. C. Farrell journeyed to Calgary by bus last Saturday week.

H. Fulton, of Calgary, visited with his family at Delia over the week end.

Tony Dignan was removed to Drumheller hospital on Sunday last for observation.

Gordon Morris, a patient in the Drumheller hospital, is reported to be making favorable progress.

Mrs. V. M. Deane was removed to Drumheller hospital for observation last week end, returning home on Sunday.

A Lord's Day of Prayer service will be held in the United Church annex at 3 p.m. Friday, February 24th.

Mild, sunny weather has been enjoyed during the past week. Fairly heavy night frosts have retarded the melting of snow, however, and, in consequence, pedestrian travel is extremely hazardous in many places.

Mr. and Mrs. W. D. Fitzsimmons, John Bradford, Hance Martin and Hugh McFarland moved to Calgary on Saturday last to attend the funeral of the late Clifford Grant, former hardware merchant in Delia, whose death occurred February 16, following an operation.

BIRTHDAY PARTY

A birthday party was held at the home of Mr. and Mrs. A. C. Bidloo recently for their son, Dennis, on his 13th birthday. The party began with three little friends as guests. To do this, it is necessary to stop thinking only in terms of the written word, but also in terms of real living experience. From the heart of man will come a new beginning of history or its end. Man himself is the cause of war or the basis of peace, and the journalist can only propagate this idea if he starts with himself. Living is more important than talking and living is even more important than writing.

Our times demand the application to all our lives of a vital Christian ideology—people who live their faith according to the moral laws. Programs of religion are important but not the end. To play its part in the regeneration of our own and other countries, is the greatest task the Press can undertake.

(Continued from Front Page, of fresh mail, grain, and clean water.

By starting with good clinks and maintaining high standards of poultry husbandry, it is possible to put profits in the laying house in the fall that will give a profitable return

Weak, Tired, Nervous, Peppless Men, Women

Get New Vin, Vigor, Vitality

See how this new tonic can help you. It is the only tonic that can be taken by men, women, and children. 12:00 My Uncle Louis.

Hot arguments produce nothing but a cold shoulder.

LET NOTHING COME
AHEAD OF THIS

First of all, when you are paid, pay yourself.

Unfailing, set aside a definite percentage of your earnings, deposit it in a savings account with us—and leave it untouched.

Then plan to live comfortably on the balance of your earnings.

In this way you are bound to succeed—to enjoy life much more, to be independent when independence means most.

Be generous to yourself.
